

TALL FESCUE

BIRMINGHAM
TALL FESCUE

TURF

**Birmingham
Tall Fescue**

Southern Born, Northern Grown, Unitedly Beautiful.

BIRMINGHAM Tall Fescue was carefully selected from plants found surviving harsh conditions in the deep South. These plants were crossed with elite genetics and then carefully screened for finer leaf texture, good lateral growth, and most importantly, excellent drought resistance. This combination of traits makes Birmingham a grass adapted to a wide region with outstanding performance.

- Early spring green up to help endure the heat of summer
- Rapid establishing for better weed suppression
- On the MD/VA approved cultivar list

PERFORMANCE DATA

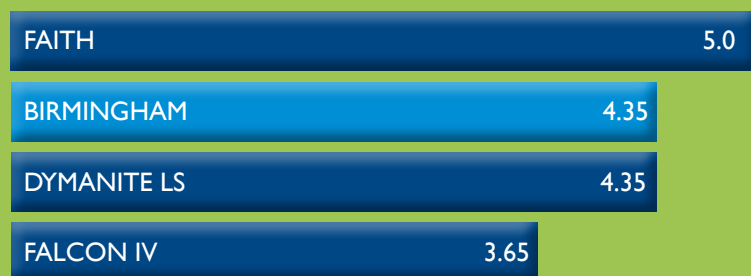

TURF QUALITY

NTEP Mean Turfgrass Quality ratings of tall fescue cultivars grown in Adelphia, NJ, 2013 data (LSD=0.05)
